RemoteLOCK

COMPLETE ACCESS CONTROL FOR

Quick Service Restaurants

Manage restaurant access at all hours– from anywhere.

Manage your employee and vendor access from RemoteLock's intuitive EdgeState software. Identify each delivery person and know when products and supplies are delivered. Provide each vendor with unique access credentials, so you can track deliveries and hold vendors accountable.

Improve vendor accountability by setting up notifications for when vendors arrive and depart, or view your restaurant's access history to confirm deliveries arrived on time. When a delivery is rescheduled or an employee is terminated, immediately reschedule or revoke access.

EdgeState software is designed for managing smart locks; providing complete control for all doors, properties, and users from a single, easy-to-use dashboard.

End unwanted restroom access and misuse.

Restrict access to employees and patrons, with options to automatically change codes, preventing misuse and vandalism. Remove the interruption of patrons asking for physical keys.

Control entry to store office.

Manage access to restricted areas like the manager's office, cash room or any other sensitive area. Enable notifications to let you know when employees, managers and guests enter and exit. Spot unusual or unauthorized access, as well as failed access attempts. Shut off employee or vendor access from anywhere, at any time.

Monitor employee access to every door.

Control access to anywhere; restrooms, kitchens, freezers, liqour storage, back doors, entrances, offices, cash rooms, IT closets, etc. Secure break rooms and know exactly how long your employees spend on break.

Identify unusual behavior.

Flag multiple entries into your cash room, spot access during strange hours, or be notified about access attempts outside of working hours. Know when employees are late for shifts or leave early. You can even integrate with time card and attendance systems for highly accurate tracking.

Never lose a key again.

Never lose a key or pay for rekeying again. No need for key replacement when an employee is terminated. Save money on locksmith charges and prevent late openings.

Restrict or grant sensitive door access remotely from anywhere.

Control access from anywhere. RemoteLock can be managed via the cloud or locally, based on your deployment requirements.

RemoteLock delivers the ability for any business to control and manage all of their connected locks from the cloud.
